

WHAT TESTS DO YOU NEED AFTER A MISCARRIAGE?

CLOTTING FACTORS

This is a thorough list of autoimmune and clotting factor testing. Blood Tests can be ordered here (U.S. clients only): <https://www.ultalabtests.com/> or through Pregmune.com

- Lupus anticoagulant
- Antiphospholipid antibodies
- Cardiolipin IgM
- Cardiolipin IgG
- Beta-2 Glycoprotein 1 IgM
- Beta-2Glycoprotein 1 IgG
- Anti-Prothrombin IgM
- Anti-Prothrombin IgG
- Anti-Thrombin III
- Plasminogen
- Protein S
- Protein C
- Activated Protein C Resistance
- Factor V Leiden gene R506Q
- Prothrombin gene G20210A
- APTT
- factor II (this is about bleeding than clotting, but...)
- PAI-1 (plasminogen activator inhibitor 1)
- fibrinogen

AUTOIMMUNE TESTS

- Anti DNA antibodies
- Anti ANA antibodies
- Anti ENA antibodies
- Anti-ovarian antibodies
- tTGA or EMA for Celiac
- HLA tissue typing
- Peripheral blood lymphocyte surface markers
- Natural killer cell ratios
- Natural Killer (NK) Cell Assay
- Th1 Th2 Assay
- Th17 Assay
- T regulatory cells
- Antinuclear antibodies (ANA)
- Leukocyte Antibody Detection (LAD) Test
- thyroid antibodies
- homocysteine
- C-reactive protein
